## CONCRETE BENCH 324-ER sides exposed aggregate

Stylish design solution that relies on the proportion and balance between two different materials. The bench is made of high quality reinforced fiber concrete and polished aggregate. The structural marble and granite stones being natural have the potential for different color combinations. Additional treatment of the polished surface with a protective coating makes the product even more resistant to aggressive weather conditions and reduces the deposition of dirt. The bench is a modern decoration for the urban exterior.
