## CONCRETE BENCH 120

1,313.00 €

Concrete bench with backrest and seating area of certified wood. It is made in combination of high-performance reinforced fiber concrete and natural aggregate. The structure of the aggregate is a combination of natural marble or granite stones of a certain size in different color combinations. All concrete surfaces are completely polished. Certified wood and concrete are further treated with a protective coating, which makes the product even more resistant to aggressive weather conditions. The metal elements connecting the wooden structure to the concrete are covered with ester-epoxy zinc primer and are powder coated. These technological methods protect the metal from corrosion and increase its performance. The elements connecting the individual structures are of stainless steel. High quality components, custom design, combined with comfort and convenience make the bench an integral part of any park in the modern city.

**Diameter:** 192.0 cm

**Length:** 55.0 cm
