METAL BENCH 124 MR

Bench combining the comfort of a certified wood and the strength of the metal. The metal structure is electro-galvanized and is powder coated. These technological methods protect the metal from corrosion and increase its performance. The planks are treated with a special coating, which protects them from aggressive weather conditions and prolongs their life. The elements connecting the individual structures are from stainless steel. Metal and wooden components have different color combinations. Together with its classic composition, the comfort in the seating area ...
