of the Future

METAL PLANTER 295-TR

Refreshing vision and ecological awareness meet in **model 295**. This metal planter is a true example of contemporary design, combining the durability of **stainless steel** with the natural beauty of wood. The wooden elements can be made from traditional wood – spruce, or **eco-friendly Resysta® wood**. This innovative material, developed in Germany, offers a **_15-year warranty_** against cracks and delamination, provided by the wood manufacturer. Planter model 295 is ideal for larger projects, where a variety of plants can be combined to create a pictur ...
